

# Detailed Contents

<b>Preface</b>	<b>xv</b>
<b>Acknowledgments</b>	<b>xxi</b>
<b>About the Author</b>	<b>xxiii</b>
<b>PART I. CONCEPTUAL FOUNDATIONS OF THE ELABORATION MODEL</b>	<b>1</b>
<b>1 Introduction to Theory-Based Data Analysis</b>	<b>3</b>
Key Concepts of Theory-Based Data Analysis	4
<i>Data and Data Analysis</i>	4
<i>Constructs and Measured Variables</i>	5
<i>Relationships and Associations</i>	6
<i>Populations and Samples</i>	7
Explanatory Data Analysis	8
Elements of the Elaboration Model of Theory-Based Data Analysis	9
<i>The Elaboration Model</i>	9
<i>Third Variables</i>	10
<i>The Focal Relationship</i>	11
<i>Complementary Analytic Strategies</i>	11
<i>Interpretation of Findings</i>	14
The Elaboration Model Illustrated: Boundary-Spanning Work Demands	15
Theory, Statistics, and Data Analysis	20
The Inherent Subjectivity of Analysis	24
Summary	25
Looking Ahead	26
Notes	29
<b>2 The Logic of Theory-Based Data Analysis</b>	<b>31</b>
Inductive and Deductive Reasoning	32
<i>Observation, Induction, and Theory</i>	32
<i>Theory, Deduction, and Observation</i>	34
<i>The Circuitous Link Between Theory and Observation</i>	36
Operationalization and the Assessment of Fit	39
<i>Constructs and Measured Variables</i>	40

<i>Populations and Samples</i>	43
<i>Relationships and Associations</i>	45
Inferences From Sample to Population	47
A Note on Measurement Error and Associations	49
The Roundabout Route of Failing to Reject a Theory	51
Summary	54
Notes	55
<b>3 Relationships as Associations</b>	<b>57</b>
Relationships as Associations	58
Associations: The Basic Building Block	59
Starting Small: Association Between the Two Focal Variables	61
<i>Association as Covariation</i>	62
The Correspondence Between Association and Theory	65
<i>Level of Measurement</i>	65
<i>Functional Form</i>	66
Establishing Relatedness: The “Third Variable”	69
The Multivariate Model	72
Interpretation of Changes in the Focal Relationship	74
The Conditional Model	76
Explanation in the Elaboration Model	79
Summary	79
Notes	80
<b>4 The Focal Relationship: Causal Inference</b>	<b>83</b>
Causal Inference in Observational Research	85
<i>Types of Causal Factors in the Social Sciences</i>	86
<i>Criteria for Inferring Causality</i>	87
<i>Endogeneity as a Threat to Internal Validity in Observational Studies</i>	88
<i>Ruling Out Counterarguments</i>	90
<i>Ascribed Characteristics as Causal Influences</i>	91
<i>The Causal Mechanism Approach</i>	92
<i>Replication</i>	93
<i>The Limits to Causal Inference</i>	94
The Exclusionary Strategy of the Elaboration Model	95
<i>Coincident Associations: Chance</i>	96
<i>Coincident Associations: Spuriousness</i>	98
<i>Redundancy</i>	100
<i>Criteria for an Effective Exclusionary Third Variable</i>	103
The Inclusive Strategy of the Elaboration Model	105
<i>Elements of the Inclusive Strategy</i>	105
<i>Antecedent, Intervening, and Consequent Variables</i>	106
The Exclusionary Strategy Revisited	108
The Conditional Focal Relationship	112

Explaining <i>Y</i> Versus the Focal Relationship	116
Summary	119
Notes	121

**PART II. REGRESSION WITH SIMPLE RANDOM SAMPLES  
AND COMPLEX SAMPLES 123**

<b>5 The Elaboration Model With Multiple Linear Regression</b>	<b>125</b>
Simple Regression: The Total Association	126
<i>Estimating the Regression Equation</i>	126
<i>Inferences to the Population</i>	134
<i>When the Focal Relationship Is Not Statistically Significant</i>	137
<i>Explanation of the Dependent Variable</i>	138
Northridge Analysis Journal 5.1 The Simple Regression Model:	
Anxiety and Fright	139
<i>Dummy Variables</i>	143
Northridge Analysis Journal 5.2 The Dummy Variable Model:	
Anxiety, Danger, and Race/Ethnicity	145
The Third Variable: Partial Association	146
<i>Estimating the Regression Equation</i>	146
<i>Inferences to the Population</i>	149
Northridge Analysis Journal 5.3 The Three-Variable Regression Model:	
Anxiety, Fright, and Characteristics of the Earthquake and Respondent	150
The Multivariate Regression Model	152
<i>Estimating the Regression Equation</i>	152
<i>Inferences to the Population</i>	153
<i>Explanation of the Focal Relationship</i>	154
<i>Explanation of the Dependent Variable</i>	155
<i>Comparisons Between Models</i>	156
Interpretation of Explained Variance	156
Interpretation of Changes in the Focal Relationship	158
Northridge Analysis Journal 5.4 The Multivariate Regression Model:	
Anxiety, Fright, and a Comprehensive Set of Third Variables	159
Summary	162
Notes	163
<b>6 Regression With Survey Data From Complex Samples</b>	<b>167</b>
Complex Samples	169
<i>Stratification</i>	171
<i>Clustering</i>	172
<i>Unequal Selection Probabilities</i>	173
HRS Analysis Journal 6.1 The Health and Retirement Study Sample Design	175
Accounting for the Sample Design	176
<i>Sample Weights</i>	177

HRS Analysis Journal 6.2 The HRS Sample and Sample Weights	179
<i>Estimating the Regression Equation and Standard Errors</i>	183
<i>Inferences to the Population</i>	185
<i>Explanation of the Dependent Variable</i>	186
<i>Subgroup Analysis</i>	186
Incorporating the Sample Design Into Analysis	187
The Question of Weights	187
Interpretation	188
HRS Analysis Journal 6.3 Regression With Complex Samples:	
Loneliness and Discrimination	188
Summary	194
Notes	195

### **PART III. THE ELABORATION MODEL WITH MULTIPLE LINEAR REGRESSION** **197**

<b>7 Ruling Out Alternative Explanations: Spuriousness and Control Variables</b>	<b>199</b>
The Nature of Control Variables	200
Spuriousness: The Illusion of Relationship	200
<i>Simple Spuriousness: The Three-Variable Model</i>	200
<i>Complex Spuriousness: The Multivariate Model</i>	205
Spuriousness: Emotion Management	207
The Statistical Analysis of Spuriousness	210
<i>Simple Spuriousness: The Three-Variable Model</i>	210
<i>Multiple Control Variables</i>	212
HRS Analysis Journal 7.1 The Focal Relationship and Spuriousness:	
Life Satisfaction and Financial Strain	214
Considerations in the Selection of Control Variables	220
Summary	220
Notes	222
<b>8 Ruling Out Alternative Theoretical Explanations: Rival Independent Variables</b>	<b>223</b>
Redundancy: Competing Theories	224
Redundancy: The Illusion of a Unique Relationship	227
<i>Simple Redundancy</i>	227
<i>Complex Redundancy</i>	230
Redundancy: Emotion Management	232
The Statistical Analysis of Redundancy	233
HRS Analysis Journal 8.1 The Focal Relationship and Redundancy:	
Life Satisfaction and Neighborhoods	235
Redundancy Versus Spuriousness	239

Considerations in the Selection of Rival Independent Variables	241
Summary	242
Notes	244
<b>9 Elaborating the Focal Relationship: Mediation and Intervening Variables</b>	<b>245</b>
Mediation: Specifying the Causal Mechanism	247
<i>The Intervening Variable</i>	247
<i>The Theoretical Classification of Variables</i>	249
<i>Mediation as Explanation</i>	253
<i>In the Absence of Mediation</i>	255
Mediation: Emotion Management	256
The Statistical Analysis of Mediation	257
<i>The Three-Variable Model</i>	257
HRS Analysis Journal 9.1 A Single Mediator: Life Satisfaction, Financial Strain, and Social Support	260
<i>Multiple Mediators</i>	263
HRS Analysis Journal 9.2 Multiple Mediators: Life Satisfaction and Optimism	265
<i>The Comprehensive Model</i>	268
HRS Analysis Journal 9.3 Mediation With a Comprehensive Model: Life Satisfaction, Social Support, and Optimism	271
<i>Countervailing Forces</i>	274
Rival Intervening Variables: The Exclusionary Strategy Revisited	275
<i>The Functions of Rival Intervening Variables</i>	275
<i>The Analysis of Rival Intervening Variables</i>	279
Rival Intervening Variables: Same-Sex Contact	280
Mediation With SEMs	281
Summary	282
Notes	284
<b>10 Elaborating the Focal Relationship: Antecedent and Consequent Variables</b>	<b>287</b>
Antecedent and Consequent Variables and the Focal Relationship	288
<i>The Conceptual Role of Antecedent and Consequent Variables</i>	288
<i>The Focal Relationship as Mediation</i>	289
Antecedent, Control, and Rival Independent Variables	291
The Statistical Analysis of Antecedent and Consequent Variables	293
<i>Antecedent Variables: The Focal Independent Variable     as a Dependent Variable</i>	293
HRS Analysis Journal 10.1 The Antecedent Variable: Discrimination and Financial Strain	295
Antecedent Variables: The Focal Independent Variable as an Intervening Variable	298

HRS Analysis Journal 10.2 The Antecedent Variable: Discrimination and Life Satisfaction	299
<i>Consequent Variables: The Focal Dependent     Variable as an Independent Variable</i>	301
HRS Analysis Journal 10.3 The Consequent Variable: Life Satisfaction and Depressive Symptoms	302
<i>Antecedent and Consequent Variables in SEM</i>	305
Summary	306
Notes	307

**11 Specifying Conditions of Influence: Moderating Variables 309**

Conditional Relationships	311
<i>Types of Conditional Relationships</i>	313
<i>The Mechanics of Conditional Relationships</i>	315
<i>Symmetry</i>	317
<i>Generalization With Conditional Relationships</i>	319
Conditional Relationships as Interactions	320
<i>Numeric Moderators</i>	321
HRS Analysis Journal 11.1 Moderation With Two Numeric Variables: Life Satisfaction, Financial Strain, and Optimism	325
<i>Dichotomous Modifiers</i>	328
<i>Categorical Modifiers</i>	333
HRS Analysis Journal 11.2 The Categorical Moderator: Racial/Ethnic Differences in the Effect of Financial Strain	335
<i>Higher-Order Interactions</i>	340
<i>Nonlinear Interactions</i>	344
<i>Moderation Meets Mediation</i>	349
Subgroup Analysis	352
Subgroup Versus Interaction Analysis	355
Considerations in the Selection of Moderating Variables	356
Summary	357
Notes	358

**PART IV. THE ELABORATION MODEL WITH LOGISTIC REGRESSION 361**

**12 The Elaboration Model With Logistic Regression 363**

The Elaboration Model With a Comprehensive Logistic Regression Model	364
<i>Multivariate Logistic Regression</i>	365
<i>Inferences to the Population</i>	369
<i>Summary Measures of Fit</i>	370
<i>Model-Building Strategy and Comparison of Models</i>	371
Northridge Analysis Journal 12.1 The Comprehensive Logistic Regression Model: Self-Perception of Being a Victim by Intensity of the Earthquake	372

<i>Interpretation of the Focal Relationship</i>	376
<i>Mediation With Standard Logistic Regression</i>	376
Northridge Analysis Journal 12.2 Mediation With Standard Logistic Regression:	
Self-Perception of Being a Victim and Intrusive Thoughts	378
Comparing Logistic Regression Coefficients Across Models	380
<i>The Problem</i>	380
<i>Approaches for Resolving the Problem</i>	382
Mediation With Rescaled Coefficients	383
Northridge Analysis Journal 12.3 Mediation With Rescaling:	
Self-Perception of Being a Victim and the Residual of Intrusive Thoughts	386
Mediation in Logistic Regression Reconsidered	388
Conditional Relationships as Interactions in Logistic Regression	389
<i>Two Numeric Variables</i>	390
<i>Two Categorical Variables</i>	392
Northridge Analysis Journal 12.4 Interaction With Two	
Dichotomous Variables: Threat to Life and Property Damage	394
Logistic Regression With Survey Data From a Complex Sample	397
Summary	398
Notes	399

## **PART V. CONCLUSION** **403**

<b>13 Synthesis and Comments</b>	<b>405</b>
Prerequisites: Theory and Statistics	406
The Elaboration Model With Multiple Linear Regression	408
The Elaboration Model With Logistic Regression	411
On Mediation and Confounding	412
The Comprehensive Model	413
Interpretation	415
Imperfect Knowledge	416

## **Glossary** **419**

## **References** **427**

## **Abbreviations** **435**
